PROFESSIONAL PROFILE

A motivated Computer Science and Engineering undergraduate at American International University-Bangladesh (AIUB) with a CGPA of 3.80/4.00 and hands-on experience across software development, database management, web technologies and cybersecurity. Has built five academic software projects in Java, C#, C++ and JavaScript, and is currently conducting thesis research on detecting AI-generated multilingual phishing attacks using machine learning, deep learning and Natural Language Processing. An award-winning presenter at an international conference, with strong teamwork and communication skills developed through group projects. Currently completing a professional course in Cyber Security and Ethical Hacking. Now seeking an entry-level or internship role in Cybersecurity, Software Development or Database Management.

SKILLS AND EXPERIENCE

Cybersecurity & Ethical Hacking

- Developed a practical foundation in cybersecurity and ethical hacking concepts using Kali Linux and Linux environments
- Set up and operated virtualised lab environments with VirtualBox to practise security tools and techniques safely
- Currently completing an offline Cyber Security and Ethical Hacking course at Creative IT Institute to strengthen hands-on skills
- Applying machine learning and NLP to a real-world security threat through thesis research on AI-generated multilingual phishing detection

Software Development

- Designed and built five software projects spanning desktop, web, game and graphics applications in Java, C#, C++ and JavaScript
- Developed a Java Swing travel management system with user registration and login, destination and package selection, admin and manager interfaces, and payment functionality
- Built a C# .NET Windows Forms event management system with separate manager and employee interfaces, task management and project status tracking
- Programmed an interactive browser-based maze game in Phaser 3 featuring multiple levels, dynamically generated mazes, scoring, lives and mechanics such as gravity shifts, teleportation and morphing mazes
- Created a C++ OpenGL animation application with moving vehicles, day/night scenes, lighting, smoke effects and keyboard/mouse interaction
- Applied Object-Oriented Programming and Data Structures & Algorithms principles throughout project development

Web Development

- Developed "Glow At Home", a beauty service booking web application using React.js, Tailwind CSS and Vite, supporting registration, login, service browsing and appointment booking
- Implemented an admin panel allowing administrators to view, accept and delete customer bookings
- Built user interfaces with HTML, CSS, JavaScript and React.js

Database Management

- Proficient in Oracle Database, SQL and PL/SQL, with completed coursework in Advanced Database Management
- Designed and connected a SQL Server database for the event management system to store registration, event and task data
- Integrated Firebase Firestore as a cloud database for storing and managing booking data

Research, Machine Learning & Data Analysis

- Conducting thesis research titled "Hybrid Deep Learning-Based Detection of AI-Generated Multilingual Phishing Attacks"
- Collecting, cleaning, preprocessing and analysing multilingual phishing and legitimate message datasets using Python
- Exploring NLP techniques for multilingual text classification and developing a deep learning-based detection approach
- Completed a 60-hour certified course in Data Analysis with Python from IIT, Jahangirnagar University

Presentation & Communication

- Won 3rd Place in the IEOM Poster Competition at the 7th Bangladeshi International Conference on Industrial Engineering and Operations Management, 2024
- Delivered an oral presentation at the same international conference on "Rise of Self-Learning in Bangladesh: AI Tools & EdTech Support Role in Modern Bangladesh"
- Collaborated effectively in team settings on three group software projects, coordinating tasks and integrating individual modules

ACADEMIC PROJECT SUMMARY

Glow At Home — Beauty Service Booking Web Application (React.js, Firebase) *Individual Project*
Dream Maze — Interactive Maze Game (JavaScript, Phaser 3) *Individual Project*
Event Management System (C#, .NET, SQL Server) *Group Project*
Computer Graphics & Animation Project (C++, OpenGL, GLUT) *Group Project*
Travel Management System (Java, Java Swing) *Group Project*

EDUCATION AND TRAINING

B.Sc. in Computer Science and Engineering, American International University-Bangladesh (AIUB) *Expected 2027*
CGPA: 3.80 / 4.00

Higher Secondary Certificate (HSC), Dhaka Commerce College *2021*
GPA: 5.00 / 5.00

Secondary School Certificate (SSC), Monipur High School and College *2019*
GPA: 4.61 / 5.00

FURTHER COURSES

Cyber Security and Ethical Hacking (Offline Course), Creative IT Institute *Ongoing*
Data Analysis with Python (60 Hours), Institute of Information Technology, Jahangirnagar University *2025*

ACHIEVEMENTS

- 3rd Place — IEOM Poster Competition, 7th Bangladeshi International Conference on IEOM, AIUB, 2024
- Oral Presentation — 7th Bangladeshi International Conference on IEOM, AIUB, 2024

ADDITIONAL INFORMATION

Programming Languages: Java, C, C++, C#, JavaScript, Python

Database: Oracle Database, SQL, PL/SQL, SQL Server, Firebase Firestore

Security Tools & Platforms: Kali Linux, Linux, VirtualBox

Development Tools: Visual Studio, Code::Blocks, Notepad++, Vite, Canva

Languages: Bangla (Native), English (Professional Working Proficiency)

Areas of Interest: Cybersecurity, Ethical Hacking, Database Management, Software Development, Web Development, Data Analysis, Machine Learning, Natural Language Processing
